

Eugenio Culurciello, PhD

Associate Professor of Biomedical Engineering
Weldon School of Biomedical Engineering

Associate Professor, School of Electrical and Computer Engineering

Associate Professor , School of Mechanical Engineering

Associate Professor of Psychological Sciences
College of Health & Human Sciences

Purdue University

Weldon School of Biomedical Engineering, Purdue University

206 S. Martin Jischke Drive
West Lafayette, Indiana 47907-2032

HIGHLIGHTS

- recipient of the Presidential Early Career Award for Scientists and Engineers (PECASE)
- Distinguished Lecturer of the IEEE, Circuit and System Society
- Founder of Teradeep Inc. in July 2014. Deep learning hardware and applications. Won several award: GigaOm Structure Data Startup of the year 2014, EE Times Startups to Watch
- Keynote address at the at System-On-A-Chip conference 2011
- Our deep learning research is featured on on the [MIT Technology Review](#), on [BBC](#), [FierceWireless](#) (Jan. 2014), and on [Business Insider](#), [Journal and Courier](#), on [18WFLI TV](#), [Phys.org](#), [the Engineer](#), [Imperial Valley News](#), [Purdue News](#), [Phone Arena](#), [Hoosier AG Today](#), [CN beta](#), (April 2014)
- Ultra-disciplinary: very wide research interests and publications in electrical engineering, neuroscience, psychology, physiology, computer science, machine learning, computer science, statistics, applied mathematics, to name a few.
- Established and managing a laboratory facility for the design and testing of microchips, boards and complete hardware / software systems, recruited and managing a group of 10+ people: 3 graduate students, 3 post-doctorate associates, 2 full-time staff programmers, 2 other students
- Managing more than 9 research projects in different multi-disciplinary fields
- Funding awarded: 5.5 M\$ in years 2004-2013
- Expert in VLSI analog and mixed-signal microchip design, digital and mixed systems

on a chip, biomedical instrumentation, algorithms on chip, product development

- Designed > 32 integrated circuits with published results (2001-2013)
- Transition to commercial products: 2 integrated circuits in production with patents
- Founder of TeraDeep Inc. December 2013 – March 2016: <http://teradeep.com/>

RESEARCH INTERESTS

- Synthetic vision systems and algorithms for replicating human vision in hardware
- Biomedical instrumentation for optical brain-machine interfaces, cell physiology
- Silicon-on-Insulator (SOI) / Silicon-on-Sapphire (SOS) circuits and systems
- Sensors and bio-sensors interfaces and integrated circuits

EDUCATION

- **PhD, The Johns Hopkins University**, Baltimore, MD
Electrical and Computer Engineering, September 2004
Thesis: “Silicon on Sapphire CMOS Circuits and Devices for Sensor Interfaces”
- **M.S., The Johns Hopkins University**, Baltimore MD
Electrical and Computer Engineering, May 1999
- **M.S., University of Trieste**, Italy
Electrical Engineering, July 18 1997

PROFESSIONAL EXPERIENCE

- Purdue University, West Lafayette, IN
Associate Professor with tenure (August 2011-present)
- Yale University, New Haven, CT
Associate Professor (July 2009 – July 2011)
Assistant Professor (July 2004 – July 2009)
Director of the ‘e-Lab’ VLSI design laboratory at Yale University
- The Johns Hopkins University, Baltimore, MD (January 1998 – July 2004)
Research Assistant, Sensory Communication & Microsystems Laboratory, Electrical and Computer Engineering, Academic advisor: Andreas G. Andreou
- Professionals College ENAIP, Udine, Italy (November 1997 – January 1998)
Instructor – Short Courses for practical training
- Johns Hopkins University, Baltimore, MD (January 1997 – June 1997)
University of Trieste, Trieste, Italy
Research Assistant in Evaluation of variable resolution displays with visual search
Academic advisors: Ernst Niebur, Accardo Agostino

PUBLICATION LIST

see website: <http://engineering.purdue.edu/elab/>

CAPABILITIES

- Machine Learning: neural networks and deep learning, supervised and unsupervised learning, clustering learning
- Computer vision: object recognition, categorization, tracking, learning
- Computer architecture: custom processors for machine learning
- Programming: Torch7, Lua, C, C++, Java, Matlab, Mathematics, Xilinx FPGA tools
- Chip design: Cadence, Synopsis, VHDL, Verilog, Spice, Tanner L-Edit

- Circuit simulation: Spice, Spectre, Hspice, EKV modeling
- Computer administration: Linux, Windows, Mac OS
- Document editing: LaTeX, Word, Illustrator, Photoshop, 3D CAD (Sketchup)

TEACHING EXPERIENCE

- BME 528/ECE 528 – Measurement & Stimulation of the Nervous System, Purdue University Spring 2015
- BME 495 Computational Neuroscience and Learning, Purdue University Spring 2014
- BME595, Artificial and Robotic Vision, Purdue University Spring 2013
- BME 301, Bioelectricity, Purdue University Fall 2012, 2013
- BME 595, Neuromorphic systems and synthetic vision, Purdue University Spring 2012
- BME ECE 695, Analog Integrated Circuits and vision systems, Purdue Fall 2011
- EENG201, Introduction to Computer Engineering, Yale 2009
- ENAS993, Silicon on Sapphire devices, circuits and systems, Yale 2008,09
- EENG 427 ENAS 627, Advanced Integrated Circuits, Yale 2005,07
- EENG 348, Digital Systems, Yale University 2005,06,07,09
- EENG 428 ENAS 628, Sensors and Biosensors, Yale University 2006
- 520.495, Microfabrication Lab, Johns Hopkins University 1998
- 520.498, Senior Design Project Laboratory, Johns Hopkins University 2003
- Computer architecture short course, ENAIP, Italy, 1997

PROFESSIONAL ACTIVITIES

- Conference program committee
 - Involved in ICLR 2013, first conference with open-review system
 - IEEE BioCAS: tutorials chair 2007, 2008, demonstration chair: 2011
 - IEEE ISCAS Special Sessions Organizer, organized special sessions in 2008, 2009, 2010.
 - IEEE ISCAS 2011 Demonstration Session Chair
- IEEE Circuits and Systems Society, Committee member:
 - Sensory Systems Technical Committee
 - Biomedical Circuits and Systems Technical Committee
 - Neural Networks Technical Committee
- Neuromorphic Engineering workshop at Telluride, CO, 2001, 2004, 2006, 2009, 2013. Led a project on retinal implant prototype, image sensor network, synthetic vision systems
- SOS Peregrine USC COOP workshop, University of Southern California, 2001
- IEEE Senior Member, Member since 1993
- Associate Editor for IEEE Transaction on Biomedical Circuit and Systems (BioCAS)
- Associate Editor for PloS ONE Synthetic Vision Systems.
- Reviewer for: IEEE Transaction on Electron Devices, IEEE Solid State Circuits Journal, IEEE Transaction on Circuits and Systems I and II, IEEE Transactions on Biomedical Circuits and Systems, IEEE Sensors, IEEE Transactions on VLSI Systems, Elsevier Optics Communications, PloS ONE, International Symposium On Circuits and systems (ISCAS), IEEE Transactions on Neural Networks, Kluwer Analog Integrated Circuits and Signal Processing, IEEE region 4 Electro-information Technology Conference, IET Electronics Letters
- Reviewer for National Science Foundation: Dr. Khosla Jan. 2005, Dr. Rao Jan. 2006,

Dr. Midkiff Dec. 2006. Invited to NSF biomedical panel Fall 2012, Spring 2013.

- Reviewer for the Natural Sciences and Engineering Research Council of Canada (NSERC) in 2008, 2009.
- Reviewer for the Qatar National Research Fund (QNRF) and the National Priorities Research Program (NPRP) in 2009 - 2013.
- Reviewer for the proposals of the Research Grants Council (RGC) of Hong Kong, in 2009.

HONORS

- Invited Talk EVW at CVPR <http://cvisioncentral.com/promotion/evw2014/> June 28th 2014, Host: Sek Chai, SRI
- Invited to the Microsoft Research Faculty Summit 2013, July 2013, Redmond WA.
- SoC Conference, keynote talk, Nov 2nd 2011, title: Vision for robots, vehicles and consumer electronics: how close are we?
- Presidential Early Career Award for Scientists and Engineers (PECASE) 2009, nominated by ONR program manager Thomas McKenna and Matthew Swiergosz. The Presidential Early Career Award for Scientists and Engineers (PECASE) is the highest honor bestowed by the United States government on outstanding scientists and engineers in the early stages of their independent research careers.
- Distinguished Lecturer of the IEEE, Circuit and System Society 2011-2012
- Our work on synthetic vision system has been featured on large number of media outlets, including MSNBC, the New York Times, the Economist (Fall 2010)
- Yale Associate Faculty Fellowship, calendar year 2010
- Best Paper Award, IEEE Circuit and System Society, for the IEEE ISCAS 2008 paper "Fall detection using an address-event temporal contrast vision sensor"
- Invited to the National Academies, NAFKI Complex Systems Conference, with full travel grant, November 13-15th 2008
- Yale Junior Faculty Fellowship, calendar year 2008
- Best poster award: "Integrated Patch-Clamp Amplifier", Farah Laiwalla, Zhengming Fu, Kate Klemic, Fred Sigworth, Eugenio Culurciello, 14th Annual CMOC Symposium, Yale University, March 17th 2005

UNIVERSITY SERVICES

- Purdue University robotics group coordinator 2012 – 2013
- Purdue University open access publication forum 2013 - 2014
- Undergraduate Curriculum committee, Biomedical Engineering, Purdue, AY 2012-15
- Graduate Curriculum committee, Biomedical Engineering, Purdue, AY 2011-12
- University Council Committee on the School of Engineering & Applied Science 2010
- School of Engineering, Vic Tyler Distinguished Lectureship committee 2009
- Electrical Engineering curriculum steering committee, 2004 - 2007
- Electrical Engineering web-page coordinator, 2006, 2008
- Space committee for Computer Engineering Faculty, 2006 - 2007
- Pierson College freshmen advisor, 2005 – 2008

COMMUNITY WORK:

- Dr. Culurciello participated in the Connecticut Pre-Engineering Program, which provides outreach to under-represented students. This acclaimed program includes almost

all of the schools in the New Haven Public School system and was the first national program to win a Presidential Award in Science, Mathematics, and Engineering Mentoring. Dr. Culurciello is involved in the Mentor Program, assisting as mentors for students in grades K- 12, and working with elementary school teachers and their classes.

- Community seminar: "What Makes Your Gameboy Work: How Electronics are Evolving", at Yale University Science Saturdays: a special lecture series designed for families that brings the excitement of research and the passion of scientists to school-age children in New Haven, October 10th 2009.

COLLABORATIONS IN INDUSTRY AND ACADEMIA

E. Culurciello started company Teradeep Inc. <http://www.teradeep.com/>, in the area of artificial vision systems, security, home-automation, internet-of-things, robotics, cloud services. Hired 10 people, large interest from large corporations: Samsung, Apple, Qualcomm, LG electronics, etc. Teradeep won a GigaOm Structure Data award as one of most-promising startups to launch in 2014. TeraDeep was invited to the Re.Work Deep Learning Summit. TeraDeep is one of 60 Hot Startups to Watch! TeraDeep is on the list of "EE Times Silicon 60: Hot Startups to Watch.

Dr. Culurciello demonstrated leadership in the field of electrical engineering by establishing several collaborations nationally and internationally in highly inter-disciplinary areas bridging electronics, neuroscience and biology. During his first two years at Yale, he collaborated with Fred Sigworth on patch-clamp circuit developments, and with Vincent Pieribone in optical brain-machine interfaces. Dr. Culurciello and Dr. Botond Roska (Basel, Switzerland), and planned the development of novel instrumentation for the study of the retina. Dr. Culurciello also helped to establish a bridge between the two ONR areas with this collaboration. He has also connected with prof. Gunhee Han (S. Korea) and prof. Jun Ohta, (Nara NAIST, Japan), who are both extremely interested in the work on optical neural interfaces and low-noise image sensors.

He has started a collaboration with Ernst Niebur (Johns Hopkins University) for the development of synthetic attentive vision system. He also works in close contact with Shih-Chii Liu and Tobi Delbruck (Zurich ETH INI, Switzerland) on vision system of interest to ONR. He has also participated to the Neuromorphic Engineering workshop at Telluride, CO in July 2009 (and also in 2001, 2004, 2006). During this meeting, he led a project on retinal implant prototype, image sensor network, synthetic vision systems.

He currently works heavily with machine-learning leaders as Yann LeCun (NYU), Andrew Ng (Stanford) Jeffrey Hinton (Google, University of Toronto)

Dr. Culurciello has also been involved in many projects with industry partners.

He has collaborated for many years with an Australian micro-chip fabrication company: Silanna. Silanna is the world leader in silicon-on-sapphire technology, a field where Dr. Culurciello is the largest world expert and has written a book on. Silanna and Dr. Culurciello developed several integrated circuits in collaboration, and are currently marketing an isolation-amplifier that was developed during this fruitful collaboration. Dr. Culurciello plans to further this collaboration during the Future Fellowship in Australia.

Dr. Culurciello collaborated with Warner Instruments, CT, a leading company in electrophysiology recording systems, biomedical instrumentation, and planar lipid bilayer technology. They co-developed instruments for the development of high-throughout patch-

clamp amplifiers, and obtained two large commercialization grant from the US National Institute of Health for a total of more than 800,000\$.

In the optical neural recording project, Dr. Culurciello collaborated with Red-Shirt Imaging to develop low-noise sensors and manufacture penny-sized sensors for recording neural activity in vivo. These sensors are currently being manufactured in large volumes for commercial production.

Dr. Culurciello is also collaborating with Google on the development of embedded vision system for use in servers. This device is used to parse videos and convert them to text.

INVITED TALKS AND SEMINARS

- JHU APL, November 5th 2014, Host: Roos Matthew, Title: Enabling gadgets to perceive the world
- Purdue University, Dawn or Doom Summit, Thursday September 18, 2014, Title: Visual Intelligence and the Terminator
- University of Udine, July 10th 2014, Host: Andrea Fusiello andrea.fusiello@uniud.it, Title: Modeling the human visual system in hardware
- Invited Talk EVW at CVPR <http://cvisioncentral.com/promotion/evw2014/> June 28th 2014, Host: Sek Chai, SRI
- University of California at Riverside, Feb 21st 2014, host: Najjar Walid najjar@cs.ucr.edu, Title: Modeling the human visual system in hardware
- Qualcomm, San Diego CA, February 7th 2014, host: Anthony Lewis, Title: Enabling computers to perceive the world
- Swinburne University Melbourne, May 28th 2013, Title: Optogenetic tools, models and hardware to reverse engineer the human visual system, host: David Liley, Swinburne
- Monash University, Melbourne, May 25th 2013, Title: Optogenetic tools, models and hardware to reverse engineer the human visual system, host: Jamie Evans
- University of Melbourne, May 22nd 2013, Title: Modeling the human visual system in hardware, host: Steven Prawer
- UIC talk/seminar, April 5th 2013, Title: Modeling the human visual system in hardware
- Qualcomm, San Diego CA, April 2nd 2013, Title: Modeling the human visual system in hardware, host: Anthony Lewis
- Google, Mountain View CA, April 1st 2013 Title: Modeling the human visual system in hardware, host: Rahul Sukthankar sukthankar@google.com
- Purdue Biomedical Sciences Seminar, March 18th Title: "Synthetic human vision: eyes for machines", host: James F. Leary
- Google NYC, January 17th 2013, Title: Image and video understanding: speeding-up computation through hardware acceleration host: Jonathan Ross hash@google.com
- Purdue University, December 14th 2012, Mathematical/Computational Cognitive Science area in the department of Psychological Sciences at Purdue, host: Sebastien Helie
- Johns Hopkins University Symposium on Visual attention, Title: Finding and learning proto-objects in a synthetic vision system, September 27th 2012. Host: Ernst Niebur
- Purdue April 2012 Computer Vision/Graphic seminar, Modeling the human visual system in hardware, host: Daniel Aliaga aliaga@purdue.edu
- University of Southern California, March 30th talk, Bio-inspired hardware vision systems for robotics, host: Hossein Hashemi <hosseinh@usc.edu>, Zahra Safarian

- Arizona State University, March 28-29, 2012, Title: Bio-inspired hardware vision systems for robotics, host: Bertan Bakkaloglu <Bertan.Bakkaloglu@asu.edu>
- Drexel University, March 20, 2012, Modeling the human visual system in hardware, Host: Mark Hempstead <mhempstead@coe.drexel.edu>
- Purdue Center Implantable Device symposium feb 24th 2012, "Biomedical instrumentation for optogenetic cortical recordings and high-throughput patch-clamp", host: Pedro Irazoqui
- Purdue BME seminar Feb 15th 2012: "Scaling up neuroscience: optogenetic neural recording", host: Nam Kong
- Machine Learning Purdue seminar, Feb 14th 2012: "Machine learning for synthetic vision systems", host: S V N Vishwanathan
- SoC Conference, keynote talk, Nov 2nd 2011, title: Vision for robots, vehicles and consumer electronics: how close are we?
- Purdue AVL laboratories seminar, "The Eye of the Terminator: Modeling the human visual system in hardware", host: Avi Kak
- Samsung, Korea, April 27th 2011, "An hardware accelerated vision system for general-purpose vision algorithms", host: Wunki Jung
- Yonsei, Korea, April 22nd 2011, "An accelerated vision processor for general-purpose vision algorithms" host: prof. Gunhee Han
- University of Illinois at Chicago, April 8th 2011 "The Eye of the Terminator: Modeling the human visual system in hardware", host: Dr. Mitra Dutta
- NYU/Poly February 15th, 16th 2011 Modeling the human visual system in hardware" host: Farshad Khorrami
- Yale Institute for Nanoscience and Quantum Engineering, January 28th 2011, Synthetic eyes, vision, and tools to reverse engineer the brain from the e-Lab team @ Yale, host Paul Fleury
- IEEE Yale chapter: "How the magic 5 from Yale vanquished Intel and nVidia: The story of NeuFlow: the first Eye of the Terminator", Tuesday, September 28th 2010, host: Hur Koser
- Purdue University, August 19th 2010, "Biomedical instrumentation for optical brain imaging and high-throughput patch-clamp", host Dr. Wodicka
- Swartz Seminar, Yale Neuroscience May 14th 2010, "The eye of the Terminator: modeling the visual system in hardware", host: Xiao-Jing Wang
- New York University NYU – May 12th 2010, "The eye of the Terminator: modeling the visual system in hardware", host: Yann LeCun
- Northeastern University March 30th 2010, "Novel biomedical instrumentation for optical brain imaging and high-throughput patch-clamp", host. Dana Brooks"
- University of New Haven, March 3rd 2010 "Integrated biomedical instrumentation: miniature patch-clamp and brain imaging devices", host: Prof. Ismail Orabi.
- University of Washington at St Louis, Feb 19th 2010, "Biomedical instruments for patch-clamp recordings and voltage-sensitive dye imaging", host: Viktor Gruev.
- Yale Science Saturdays, October 10th 2009, "What Makes Your Gameboy Work: How Electronics are Evolving", host: Ainissa Ramirez
- Yale - Aging Research Seminar: "Synthetic vision system for assisted living" 9/2/2009, host: Lisa Barry.
- Telluride Neuromorphic Engineering Workshop, July 3rd 2009: "Optical Neural Recording: in-vivo fast functional brain imaging with fluorescent dyes".

- Yale Biomedical Engineering Seminar, April 16th 2009: "Novel instrumentation for optical brain imaging and high-throughput patch-clamp", host: Erin Lavik.
- DARPA NeoVision 2, "Efficient feedforward categorization of objects and human postures with address-event image sensors", April 8th 2009.
- Samsung Research, Korea, "Event-based image sensors for synthetic vision", December 5th 2008, host: Seog-Heon Ham.
- Yonsei University, Seoul S. Korea, December 5th 2008, host: prof. Gunhee Han.
- KAIST (Korean Advanced Institute of Science and Technology), Daejeon S. Korea, December 9th 2008, host: prof. Hoi-Jun Yoo.
- National Academies, NAFKI Complex Systems Conference, invited with full travel grant, November 13-15th 2008.
- Columbia University, "Silicon-on-sapphire: mixed-signal circuits and micro-systems design and opportunities", October 31st 2008. Host: prof. Yannis Tsividis.
- IEEE International SOI conference, "Mixed Signal Microsystems in Emerging SOI ", invited talk, October 6-9 2008. Host: Mario Pelella, AMD.
- DARPA DSRC Electronic Stem Cell, "Efficient feedforward categorization of objects and human postures with address-event image sensors", June 5th 2008, host: Paul Hasler.
- University of Washington, "Integrated potentiostat for patch-clamp instrumentation", invited to weekly Electrical Engineering seminar series, Friday May 23rd 2008, Host: prof. Mani Soma.
- Texas A&M University, "A Silicon on Sapphire Instrument for ion channels patch-clamp research", Thursday, February 28, 2008, invited seminar for the Department of Electrical and Computer Engineering. Host: prof. Edgar Sanchez-Sinencio.
- Cornell University, "An integrated patch-clamp potentiostat", March 14th 2008, invited to the Department of Electrical and Computer Engineering, seminar Analog Devices VLSI Series. Host: prof. Alyssa Apsel.
- University of Milan, Politecnico of Milan, Italy, "Current-mode biosensors for cell physiology", December 17th 2007, invited to a Seminar lecture. Host: prof. Marco Sampietro.
- University of Trento, Italy, "Address-Event image sensors for sensor networks", July 16th 2007, invited to a Seminar lecture. Host: prof. Massimo Gottardi.
- Tufts University, "An integrated patch-clamp amplifier in silicon on sapphire CMOS", April 10th 2007, invited to weekly Seminar lecture. Host: prof. Sameer Sonkusale.
- Yale university, "Address-event image sensors: a future view of the world", invited to the Applied Mathematics Seminar, Tues. Sept. 12th 2006. Host: prof. Ronald Coifman.
- Princeton University, "An Integrated Patch-Clamp Amplifier and the Battle of Bulk-Silicon vs. Silicon on Insulator CMOS", Invited colloquium speaker at the weekly colloquium series, March 13th 2006. Host: prof. Sigurd Wagner.
- University of Arizona, "Address-event image sensors and networks", Invited colloquium speaker at the weekly colloquium series, March 3rd 2006. Host: prof. Andreas Spanias.
- University of Connecticut, "Silicon on Sapphire Systems and Devices", Invited colloquium speaker at the ITE weekly colloquium series, April 22nd 2005. Host: prof. Faquir Jain.
- Yale University, "Silicon on Sapphire Technology: Systems and Devices", invited to the Center for Systems Science Seminar Series. April 1st 2005, Host: prof. Kumpati Narendra.
- University of Udine, Italy, invited lecture: "Silicon on Sapphire Technology Systems and

GRANTS AND AWARDS

Current awards:

- NIH (PI Vincent Pieribone, Co-PI: E. Culurciello), "High-Speed, wide field fluorescent imaging of cortex in freely moving animals", Total Purdue Amount: \$1,168,196, Total period: August 2012- August 2016.
- ONR PECASE (PI: Eugenio Culurciello) Title: A Trillion Operations-Per-Second Vision System for DoD Applications, Total Award Amount: \$1,000,000, Total Period: 02/01/11 – 01/31/15
- ONR MURI (PI: Ernst Niebur, lead Johns Hopkins Univ.) Title: Figure-Ground Processing, Saliency and Guided Attention for Analysis of Large Natural Scenes, Total Award Amount: \$4,500,000, Amount award: \$463,407, Total Period: 06/01/09 – 05/31/14

Past awards:

- ONR, Development of a Scalable Hyperbaric (0-500 psig) Multichannel Instrumentation (Plana Patch Clamp) for High-throughput, Single-cell Analysis of the Pharmacological Modulation of Macroscopic Ionic, Project Period: 09/12/11-09/11/15, Total Sponsor Award: \$480,000,
- Google Research Awards program, "Hardware-accelerated scene-understanding vision system", Total Award Amount: 57,500, Period: Sept 2012-Aug 2013.
- NSF IDBR: High-Throughput Instrumentation for Lipid Bilayers and Patch-clamp, , Sponsor Award No.: 1154498-DBI, Total Award Amount: \$660,000, Total Period: 08/15/2011 to 06/30/2014,
- NIH (PI Vincent Pieribone, Co-PI: E. Culurciello), Title: High-Speed, wide field fluorescent imaging of cortex in freely moving animals, Total Award Amount: \$140,000, Total Period: 9/1/2011 – 8/31/2012
- NSF ECS-0622133 (PI: E. Culurciello), Title: A Lightweight Event-Based Synthetic Vision System for Assisted-Living and Machine Vision Applications, Total Award Amount: \$330,000, Total Period: 07/01/09 - 06/30/12
- DARPA NeoVision 2, HRL Lab, LLC (Co-PI: E. Culurciello), Award Amount: \$299,493, Total Period: 10/01/09 – 12/31/13
- NIH (PI Vincent Pieribone, Co-PI: E. Culurciello), Title: High-Speed, Wide Field Fluorescent Imaging of Cortex in Freely Moving Animals, Total Award Amount: \$1,131,473, Total Period: 07/01/09 – 06/30/11
- NIH STTR Phase II (PI: F Sigworth, Co-PI: E. Culurciello), Title: Patch Clamp Amplifier on a Chip, Total Award Amount: \$449,999, Total Period: 04/01/09 – 03/31/11
- ONR BAA 2008 (PI: E. Culurciello), Award No.: N000140810065, Title: Patch Clamp Amplifier on a Chip, Incremental funding: \$44,500, Total Period: 10/15/08-10/14/11
- ONR BAA 2008 (PI: E. Culurciello), Award No.: N000140811014, Title: A High-Speed, In-vivo Optical Neural Recording System, Amount of Award: \$381,697, Total Period: 10/15/08-10/14/11
- ONR BAA 2007 (PI: E. Culurciello), Title: Integrated Microscale Biosensor for Cell Membrane and Patch-Clamp, Total Award Amount: \$439,471, Total Period: 10/15/07-10/14/10
- NSF (PI: E. Culurciello, Co-PI: F. Sigworth), Title: IDBR: High-Performance Integrated Patch Clamp Amplifiers, Total Award Amount: \$547,974, Total Period: 07/01/07 – 06/30/10

- NSF ECS-0622133 (PI: E. Culurciello, Co-PI: Savvides), Title: A Lightweight Event-Driven Network of Biomimetic Image Sensors, Total Award Amount: \$270,000, Total Period: 09/01/06 – 08/31/09
- NIH STTR 1R41NS062408-01A1, “ Patch Clamp Amplifiers on a Chip”, (PI: Fred Sigworth, Co-PI: E. Culurciello), Total Award Amount: \$134,245, Total Period: 06/01/06 – 05/30/07
- ARO STIR 53393-LS-II (PI: Vincent Pieribone, Co-PI: E. Culurciello), Title: Development of an Implantable Optical Neuroprosthetic: System Integration and Testing, Total Award Amount: \$50,000, Total Period: 09/01/07 – 05/31/08
- ARO STIR 193 (PI: Vincent Pieribone, Co-PI: E. Culurciello), Title: Development of an Implantable Optical Sensor for Use in Neural Prosthetics, Total Award Amount: \$50,000, Total Period: 07/20/06 – 04/19/07
- Peregrine Semiconductors (PI: E. Culurciello), \$10,000 grant for research on energy harvesting circuits, 2007

STUDENTS AND STAFF

Postdoctorate and Research associates:

- Dr Evan JoonHyuk Park, Jan. 2013 – optical neural recording, – 1st job: startup embedded sport equipment
- Dr. Phi-Hung Pham, Jan 2012 – neuromorphic vision microchips, – 1st job: LG Electronics, USA
- Dr. Shoushun Chen Postdoctorate associate, PhD Hong Kong University of Technology, Jan. 2008-Jun. 2009, – 1st job: assistant professor at Nanyang Technical University (NTU) Singapore.
- Dr. Dongsoo Kim, PhD Yonsei University 2008, S. Korea, Postdoctorate associate since Jan. 2008 -June 2010, 1st job: Aptina Inc.
- Dr. Selcuk Talay, PhD Bogazici University, 2007, Turkey, Postdoctorate associate since Aug. 2009
- Dr. Andrew Kunil Choe, PhD Yonsei University 2007, S. Korea, Postdoctorate associate from Nov. 2009 – September 2010, – 1st job: LG imaging sensors, Korea

Staff:

- Berin Martini, Software developer, full-time since June 2008
- Polina Askelrod, Software developer, full-time Sep. 2008 – June 2011
- Farah Laiwalla, 2004-2005, moved to graduate studies at Brown University.
- Jordan Bates, Software developer for neural networks, Fall 2011 – Spring 2013

Former PhD students:

- Pujitha Weerakoon – 1st job: Postdoctorate associate in Fred Sigworth lab, Yale University.
- ZhengMing Fu – 1st job: Freescale Semiconductors.
- Brian Goldstein – 1st job: Ion Torrent Inc.
- Evan JoonHyuk Park – 1st job: postdoctorate Associate, Pierce Institute, Yale University.
- Wei Tang – 1st job assistant professor at the University of New Mexico

PhD students:

- Alfredo Canziani, PhD Candidate
- Aysegul Dundar, PhD Candidate

- Vinay Gonkusale, PhD Candidate
- Jonhoon Jin, PhD Candidate
- Giovanni Barbera ME PhD Candidate

Visiting students:

- Angelo Rottigni, Politecnico di Milano, Italy, Fall 2009
- Jose Carrasco, University of Sevilla, Spain, Fall 2008
- Paolo Manfrin, University of trieste, Italy, Fall 2008
- Evan Park, RPI University, Summer 2005
- Dongsoo Kim, Yonsei University, S. Korea, Spring 2008

Undergraduate students:

- Henrique Rocha, Spring 2007, Fall 2007 – hyper-resolution on image sensors
- Kofi Keteku, Summer 2007 and academic year 2007-08 – Fall detection sensor
- Matthew Herpich, all academic year 2006-07 – Patch-clamp Bio-sensor
- Simba Marrakesh, all academic year 2006-07 – Octopus image sensor
- Ajay Kishore, Spring 2006 – image sensor light adaptation
- Hazael Montanaro, Summer 2008, 2009 – patch clamp amplifier software interfaces
- Jonathan McMillian, Summer 2009, year 2010 – embedded software for vision
- Conrad Lee, Summer 2009 – Visual attention coding
- Faye Zhao, Summer 2010 – synthetic vision system and convolutional neural networks
- Ifigeneia Derekli, Summer 2010 – synthetic vision system and convolutional neural networks

PERSONAL INFORMATION

Spoken languages: Fluent in Italian and English, basic Korean and Chinese

Citizenship: US, Italian citizenship, European Community

Marital Status: Married

Hobbies: Spending time with my wife Kyoungsoo and our son Geo, Volleyball, home improvements, painting, cooking/baking, hacking computers and cellphones, programming embedded devices.
